

# Baptismal Gowns

Our minister and candidates baptismal gowns are made from materials that remain opaque when wet. The ministers gown has enough fullness as well as inner sleeves to provide a light weight garment but also a sense of modesty. Our candidate gown is made from heavy twill and provides a great deal of opaqueness when wet. However it is recommended that undergarments are worn with these gowns. All gowns include weighted hems to prevent floating.

This gown gives prestige and comfort to your Baptismal Candidate. Each gown is tailored with triple fullness pleats surrounding the yoke. A weighted bottom hem prevents it from floating. Material is opaque when wet. Available for men, women and children.
